Farming Center Details for Tracing Code 8213

1.- Farming Site

Punta Ganso Growing Center started its operations in the year 2007 and the present cycle started on July 2014. It is located at Puerto Cisnes production area, specifically placed at Canal Puyuhuapi. For this present cycle the specie cultivated is *Salmo salar*. This center consists of two modules of 16 cages. The site received 1.69 treatments containing Oxytetracycline and Florfenicol.

2.- Unit (Cage)

The unit associated to the TRACING CODE 8213, is the cage 7. The food consumed by this cage in some of its components such as soybean meal, their derivatives and corn gluten, could possibly have contained GM material in more than 1%.

3.- Farming Site Manager

The Growing Center is in charge of Mr. Edgardo Nitor, married. Title Medico Veterinario, Universidad Austral de Chile. The team of this Growing Center is formed by 5 employees. Senior Technician Juan Cardenas, Technician Luis Hidalgo, Junior Technicians Ricardo Urrutia, Patrick Mac Kinnon and the Assistant Jenifer Peña.

This section aims at providing the consumer with a detailed "life history" of the product he has in hands. Here the consumer can study in details the history of the farming unit his product originates from. Los Fjordos, in it's pursue to become the leader in the South American fish industry, offers its consumers the possibility to track the product they buy and therefore to be able to trust their quality. This perfect traceability explains why we have become the leading company in achieving the highest quality standards based on all related certifications
